# OUR OFFERINGS

## DOMAINS

Your website's domain name is a digital address. It allows you to be discovered by the people you want to let know about your existence. The more distinctive the domain is, the more confidence is given to your company. There are various domain forms for different kinds of companies. You need to select a domain that is distinctive and easy to find to top the search engine game, however.

Domain Reseller

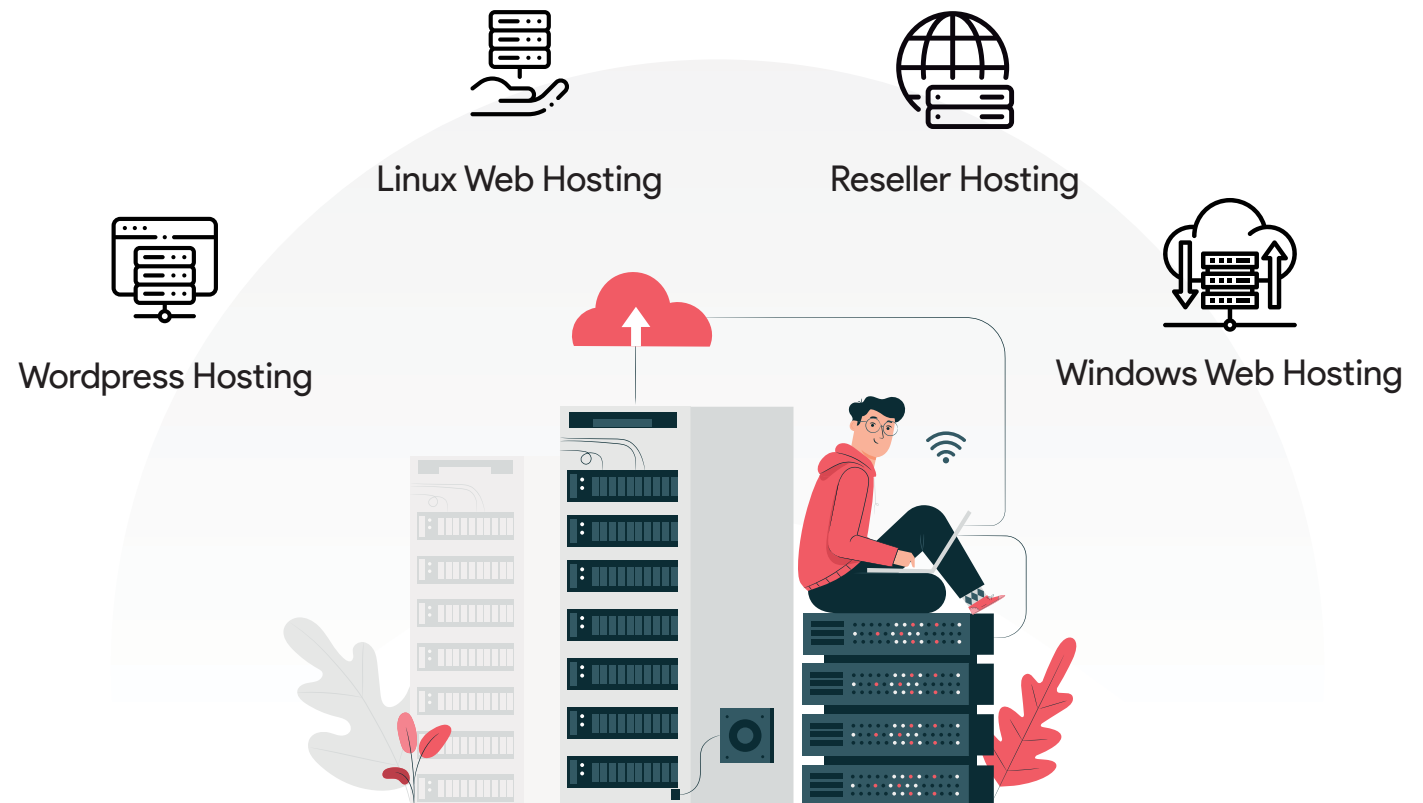

Premium Domain

# OUR OFFERINGS

## HOSTING

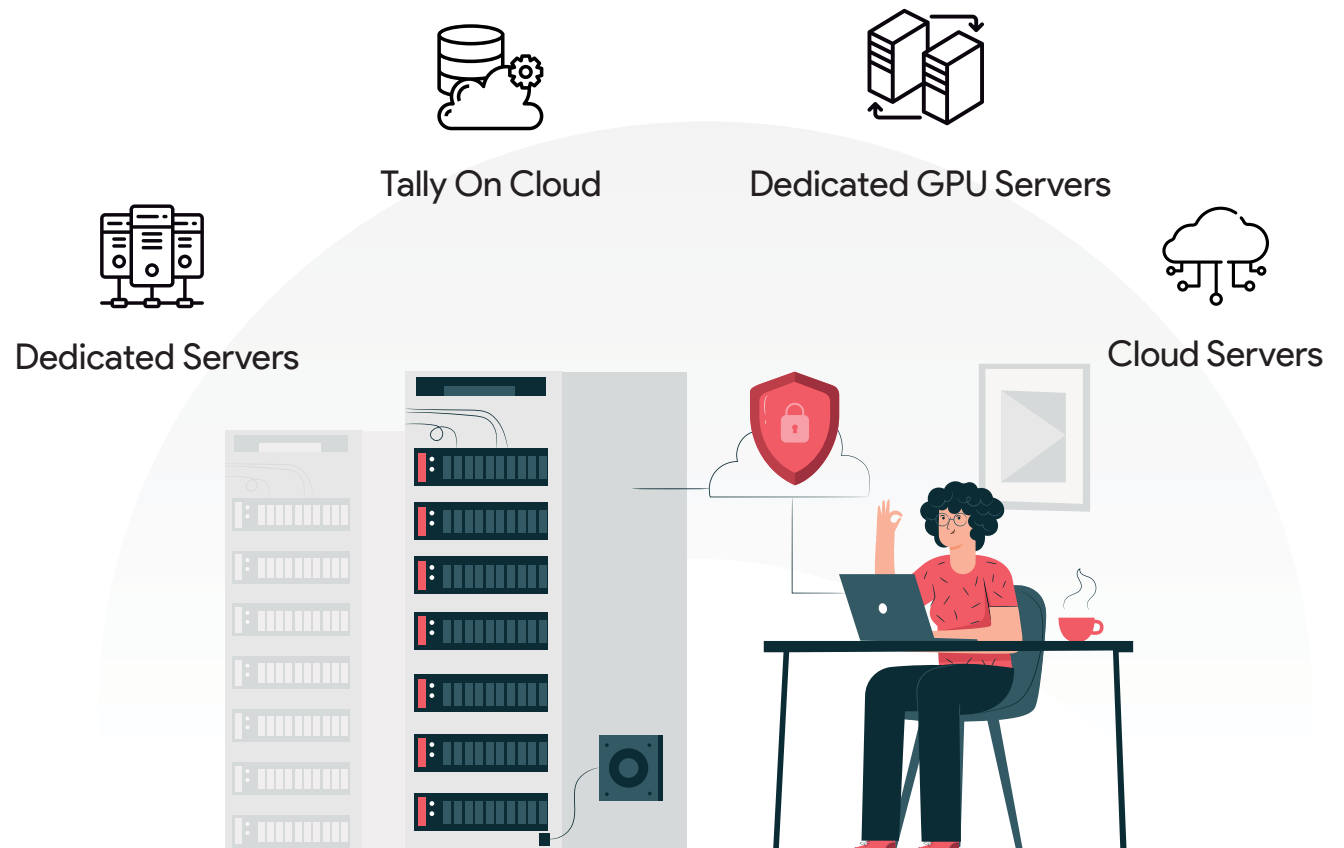

Hosting offers individuals and organizations with a forum to promote their products and services on a website. To create contact and grab attention, it links you with mainstream audiences. What they need to do is type your website address or domain into their computer when internet users try to visit your website. Their machine will then connect to your server, and via the browser, your web pages will be sent to them.

# OUR OFFERINGS

## SERVERS

Servers are a collection of massive, powerful machines that store and view your files , data or content on the Internet. These servers are all located in a area known as a datacenter geographically. There are various types of servers to suit the form of company and its data storage capacity. Decide whichever one satisfies your needs and you're cool.

# OUR OFFERINGS

## EMAIL & OFFICE

Servers are a huge, powerful machine collection which stores and views your data or content on the internet. All these servers are in a region known geographically as a datacenter. There are different types of servers for the shape and storage space of your business. Decide whatever you want, and you are cool.

# OUR OFFERINGS

## SECURITY & BACKUP

A website contains confidential consumer information that must be correctly encrypted. Hide your site information with the https encryption and ensure user reliability and ensure your customer information is not broken. Meanwhile, due to unpredictable circumstances, you can remain concerned about lack of data, since you can restore it with our highly powerful backup services at any time.

# OUR CLIENTS EXPERIENCE

Extremely happy with the service levels provided by Techkguru. Mustaq was very professional and was very transparent throughout the engagement. He undercommitted but overdelivered, he completed our requirement in a day which was pending for weeks with the other partner. Really appreciate and recommend Techkguru for their excellent service.

**Palanisami N**

Mustaq is a customer service focused experienced techie. He understand the value of customer satisfaction and at Techkguru, he is offering robust solutions at competitive pricing with his personal support.

**Dharmesh Doshi**

I am very happy and the deal with I got from the tech guru hosting. The web hosting is amazing, it's fast, and the benefits which I got from the hosting is mind blowing. Being the user of the this hosting. I highly recommend to people who want web hosting, SSL, DOMAIN etc.

**Rahul Jaiswar**

I got reference for Techkguru from one for my business partner. I am lucky to find such a company. Service is prompt and Quick support for any technical issue you are facing. Price is affordable if we compare to godaddy and bigrock etc. I recommend their services.

**Prasad andure**

Founder, Coinage Soft.

With such a lightening website and free SSL certificate, no one offers so responsive, customer friendly support on the market. That is to say, free https in front of your site. TECHKGURU people are terrific. I've been hosting one of my web sites for several months now: icsemaths.in, which works perfect. Treat it all perfectly.

No other hosting player offers these facilities. With their service, I am very happy and very pleased. They are very valuable in their work.

**ICSE MATHEMATICS**

They provide the best support for all web hosting related issues. The support executive of TECH GURU HOST has been very quick to respond and resolve. Happy to host with TECHGURU. I would recommend their services to everyone.

**Goyal Infotech**

All you need from a hosting company is uptime and good customer support, Tech Guru Host has them both, after trying so many other providers I believe I have found someone I can trust. No downtime until now. Thumbs up!

**Aiyaz Mohammed**

# OUR CLIENTS

# OUR PARTNERS

# OUR INFRASTRUCTURE

We own servers in Tier-III and Tier-IV datacenters in US and India.

Large server rooms with ample space to manage computing racks.

Multiple security layers to prevent against unethical breaches.

N+1 redundant cooling, power and connectivity.

Reliable and superior power density of up to 300 watts/sq. ft.

Both datacenters render 14+ days of uninterrupted power supply.

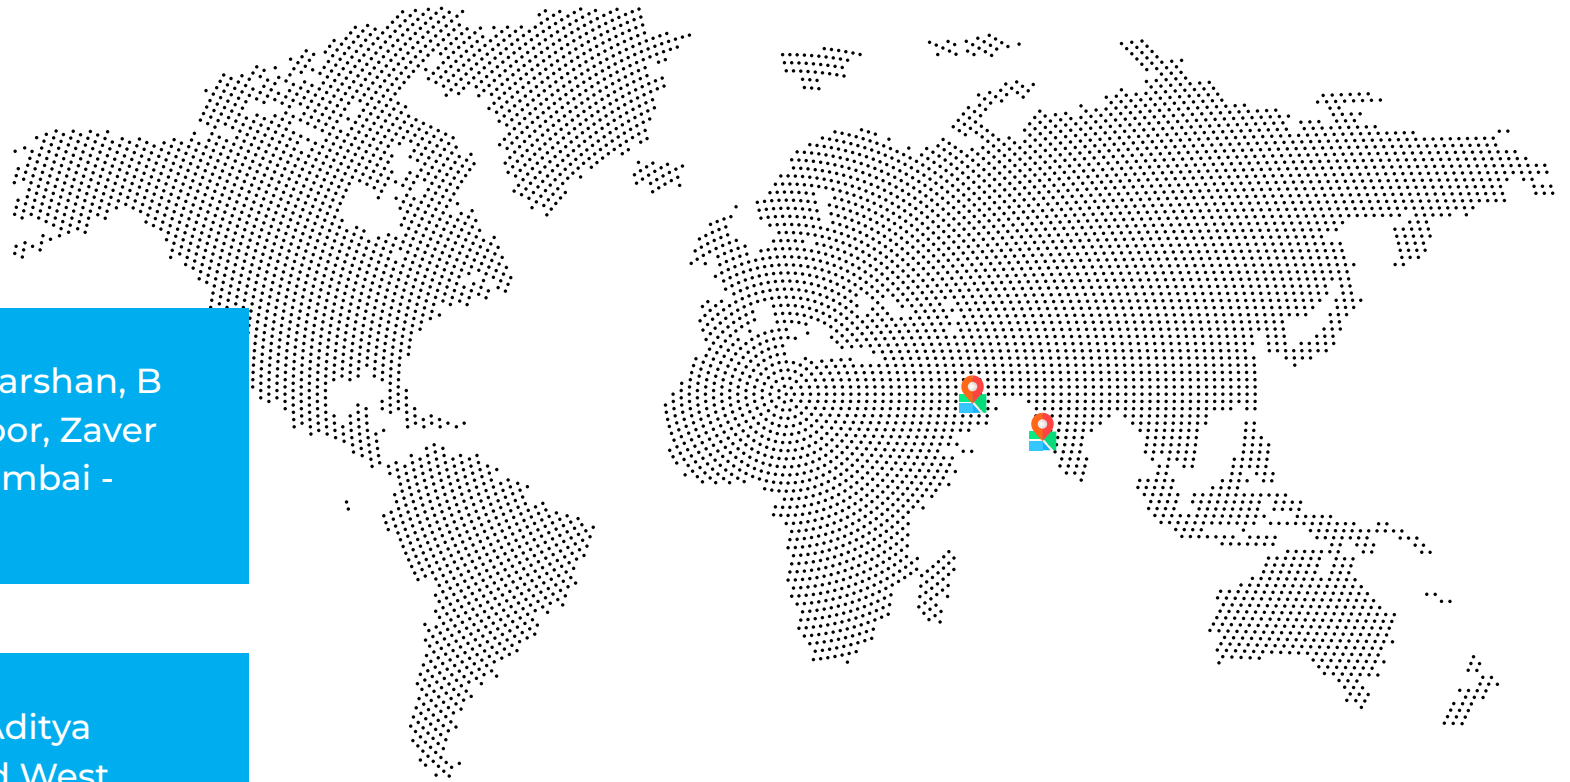

Carrier- Neutral facility to interconnect with colocation providers.

Protected by DDoS monitoring, detection and mitigation services.

Fire suppression systems for servers against IT disasters.

24/7/365 on-site network operations center to resolve queries.
